The Minister of Health Jose Angel Portal Miranda specifies that the first thing is to make the tasks very clear To resolve the quality of care.

This strain is of concern; high transmissibility; shortens the times of people who get sick; to assume the consequences of what is happening to us.

Today the province has officials from the Ministry of Health to support each of the territories, emphasizing Cardenas and Matanzas.

To support all levels of care, there cannot be an office without a doctor and a nurse, and today we have helping interns who finished their training as doctors and are certified.

To achieve proper care of health personnel That the population believe in their doctor and nurse; to achieve a decisive job Coupled with this, we must put ourselves in function of ideological political work To research with the required quality This strain is 64% more contagious so cutting transmission is the first task The effect of the vaccine, to help them with the planned actions.

Some of the issues discussed in the Municipality of Matanzas with health workers; officials of Matanzas
